47, bd. A. Blanqui
Paris XIII

Mechanicam vero duplicem Veteres constituerunt: Rationalem quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique Mechanica nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut Mechanica omnis a Geometria ita distinguatur, ut quicquid accuratum sit ad Geometriam referatur, quicquid minus accuratum ad Mechanicam. Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.

NEWTON

La généralité que j'embrasse, au lieu d'éblouir nos lumieres, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité.

EULER

... ut proinde his paucis consideratis tota haec materia redacta sit ad puram Geometriam, quod in physics & mechanicis unice desideratum.

LEIBNIZ

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely in original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding an excessively condensed or crabbed style.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

CONTENTS OF VOLUME 14

	Page
BRAMBLE, J. H., & L. E. PAYNE, Upper and lower Bounds in Equations of Forced Vibration Type	153
COOPER, J. L. B., Some Problems in the Theory of Fourier Transforms	213
DUFFIN, R. J., Free Suspension and Earnshaw's Theorem	261
ERDÉLYI, A., & M. WYMAN, The Asymptotic Evaluation of Certain Integrals .	217
EDMUNDS, D. E., On the Uniqueness of Viscous Flows	171
ERICKSEN, J. L., Non-existence Theorems in Linear Elasticity Theory	180
FINN, R., New Estimates for Equations of Minimal Surface Type	337
GLOISTEHN, H. H., Monotoniesätze und Fehlerabschätzungen für Anfangswertaufgaben mit hyperbolischer Differentialgleichung	384
HYERS, D. H., & W. T. KYNER, The Existence of Symmetric Steady Flows near Critical Speed	264
JEFFREY, A., The Development of Jump Discontinuities in Nonlinear Hyperbolic Systems of Equations in Two Independent Variables	27
KYNER, W. T., see HYERS, D. H.	264
MEINARDUS, G., Invarianz bei linearen Approximationen	301
MEINARDUS, G., & H.-D. STRAUER, Über Tschebyscheffsche Approximationen der Lösungen linearer Differential- und Integralgleichungen	184
MEISTER, B., Die Anfangswertaufgabe für die Störungsdifferentialgleichungen des Taylorschen Stabilitätsproblems	81
MEYERS, N. G., An Example of Non-Uniqueness in the Theory of Quasi-Linear Elliptic Equations of Second Order	177
PAYNE, L. E., see BRAMBLE, J. H.	153
REDHEFFER, R. M., Die Collatzsche Monotonie bei Anfangswertproblemen . .	196
SCHRÖDER, J., Monotonie-Eigenschaften bei Differentialgleichungen	38
SELL, G. R., Stability Theory and Lyapunov's Second Method	108
SERRIN, J., A Priori Estimates for Solutions of the Minimal Surface Equation .	376
SHOEMAKER, E. M., A Theory of Linear Plasticity for Plane Strain	283
SIBUYA, Y., Asymptotic Solutions of Initial Value Problems of Ordinary Differential Equations with a Small Parameter in the Derivative, I	304
STRAUER, H.-D., see MEINARDUS, G.	184

	Page
TING, T. W., Certain Non-steady Flows of Second-order Fluids	1
WANG, D. P., & T. YAO-TSU WU, Small-Time Behavior of Unsteady Cavity Flows	127
WASOW, W., Singular Perturbation Problems of Systems of Two Ordinary Analytic Differential Equations	61
WILCOX, C. H., The Steady-state Diffraction of Electromagnetic Radiation by an Obstacle in an Inhomogeneous Anisotropic Conducting Medium	326
WOLSKA-BOCHENEK, J., Application de la méthode des approximations successives à la résolution d'un problème aux limites de l'hydrodynamique . . .	405
WYMAN, M., see ERDÉLYI, A.	217
YAO-TSU WU, T., see WANG, D.	127
